

VARIPHONE HEARING PROTECTOR

Ear-O-Tec is the licensee for the innovative Variphone adjustable hearing protection device which offers comfort, durability, affordability and adjustable attenuation levels. The unique two-canal design of the Variphone allows for fast and effective quality controls and regular check-ups. The adjustable valve allows the attenuation to be set to reduce the noise load to a safe level.

www.earotec.com.au

Ear-O-Tec recognises the advantages of using trained implementers. Our network of trained technicians undergo specified training and are certified to implement the program and the products we promote.

After an ear examination, an ear impression is made for the manufacturing of an individual Variphone® hearing protector. A second visit is necessary for the fitting procedure and fulfilling the standard quality controls. Each device will be leak tested and fitted in the ear of the wearer. Attenuation is then adjusted according to each individual's exposure levels as indicated by safety staff.

The Neurosensory Unit now also offer, amongst their various other services, the Variphone custom hearing protection devices to your doorstep. Working closely with 25 Ear, Nose and Throat Specialists from 10 clinic locations, The Neurosensory Unit is committed to delivering high quality services to the Queensland area. They operate with the highest ethical standards, offering quality products and superior service that results in long-term client satisfaction.

In addition to the world-leading Variphone hearing protectors, they can also provide the following services:

- Paediatric and adult diagnostic hearing assessments.
- Balance tests.
- Auditory Processing assessments for children with learning difficulties.
- Tinnitus assessments and management programs.
- A full rehabilitation program for people with hearing loss which could include the assessment, fitting maintenance and repairs of:
 - Hearing aids.
 - Cochlear Implants.
 - Bone Anchored Hearing Aids.
- Communication devices and accessories.
