

ASX ANNOUNCEMENT & MEDIA RELEASE

31 March 2010

SABRE COMMENCES DRILLING AT BORDER DEPOSIT

Sabre Resources Ltd (Sabre) is pleased to confirm that drilling has commenced at the Border lead-zinc deposit in the Ongava Project, Otavi Mountain Land, northern Namibia. The two diamond drilling rigs on site are targetting:

- extensions to known mineralisation;
- strong geophysical anomalies 200m south of known mineralisation; and
- strong, broad geophysical anomalies at depth beneath known mineralisation.

Ongoing poor weather has not hindered access to Border due to track upgrades carried out by Sabre in 2008. Ground conditions on site are good.

Results of the drilling programme will be announced as they come to hand.

For further information regarding the Company's activities, please contact:

Dr Matthew Painter – General Manager – Exploration
